Education

Bachelor of Science

Computer science

Unity University - Addis Ababa

3.13/4.0

Professional Summary

Computer science graduate with expertise in software development, cloud technologies, and problem-solving. Proven experience in full-stack web development, C++ applications, and machine learning projects. Proficient in modern tools such as Docker, consistently achieving high performance in academic and practical settings. Committed to contributing to innovative technology teams while pursuing continuous learning and professional growth.

Project

Ethiopian electric utility management system (EEUMS)

- Developed a web-based utility management system using modern web technologies to streamline electricity service operations, customer management, and administrative workflows. Administered all necessary medications as directed by care plan.

Maze Ball

- Maze Ball is an interactive web-based maze game where players navigate a ball through challenging levels filled with obstacles and pathways. The project focuses on delivering an engaging user experience with smooth controls, responsive gameplay, and visually appealing design while improving problem-solving and coordination skills.
